Organic Farmers of America USDA Mailing List

This comprehensive list of hard-working, family-oriented farmers, experience a rich and rewarding life in rural America. Since these families are in the business of agriculture, they participate in a host of financial and producer programs administered by the Farm Service Agency. They are high income, high producers who purchase farm equipment, organic pesticides, safety equipment, fleet transportation services, as well as computer supplies, outdoor and sportsmen's equipment, apparel and gifts for their home, business, and families

OSHA Data Information Services (ODIS) is a premier compiler of consumer and business information that specializes in sourcing public records from federal, state, county, municipal and international governments. Its experience with the Freedom of Information Act (FOIA) and equivalent state and international open public records laws, along with long standing relationships with government agencies, offers efficiencies unavailable to those seeking to obtain government sourced data independently.

This comprehensive list of hard-working, family-oriented, organic farmers experience a rich and rewarding life in rural America. Since these families are in the business of organic agriculture, they participate in a host of financial and producer programs administered by the Farm Service Agency.

The Organic Foods Production Act required the USDA to develop national standards for organically produced agricultural products, to assure consumers that agricultural products marked organic meet consistent, uniform standards. The National Organic Program regulations mandate that agricultural products labeled as organic originate from farms or handling operations certified by a State or private entity that has been accredited by the USDA. The NOP is a marketing program housed within the USDA Agricultural Marketing Service.
